**LEEDS DATA MILL IS 300 & COUNTING**

Leeds Data Mill has now over 300 published datasets ranging from ‘the top authors borrowed from Leeds Libraries’ to ‘heritage lottery funded projects’. Thanks to all our publishers, contributors, analysts, developers and you for helping us go from strength to strength!

---

**CASUALTY MAPPING**

Using data published by Leeds City Council, Liam Bolton and Student Data Labs have created two new visualisations which allow you to explore and derive insight into cycling casualties and pedestrian casualties resulting from road traffic accidents occurring in Leeds (2009-2015).

**#FLOODHACK16 FOLLOW UP**

A follow up to #Floodhack16 was hosted by ODI Leeds on 1st July to discuss progress and share new ideas.

One of the great ideas was a map produced by the University of Leeds which mashed Environment Agency data with Twitter feeds over the same time period showing on the ground reactions to the flood.

Find out more and join the conversation using the hackpad:

**#HIGHWAYSHACK16**

Highways England are keen to improve on openness and transparency and are looking to publish more open data on Leeds Data Mill. On Tuesday 5th July, ODI Leeds hosted an introductory meeting to discuss what data would be useful and how it could be re-used at a proposed HighwaysHack in October.

The meeting was well attended and resulted in some good ideas. Check out the Google doc for more details and get involved in the conversation: https://t.co/3JCf4sifxF

---

**3RD SECTOR CHALLENGE**

LDM has been increasingly speaking to organisations working in the 3rd sector. A recent Demystifying Data workshop at ODI Leeds brought many organisations together to discuss how data could be better used and shared. Do you work in the 3rd sector and want to join the conversation? Contact us at open.data@leeds.gov.uk.

**WHICH BIN?**

Launched on 5th July, Leeds Bins turns the household waste collection dataset into a useful bin collection app. Not only does it notify you which bin is due for collection and when, it also provides really useful recycling information with links back to the council’s waste pages on leeds.gov.uk.

**CONTRIBUTE**

Have you used Leeds open data in the development of an app or website?

Have you gained insight or analysed the data for research or a story?

If so, we’d love to promote what you’re doing so get in touch and we can discuss adding your product to our ever growing Products page:
http://leedsdatamill.org/community/

**GREAT SENSE OF HOME**

Based on the popular dating website style, GSOH helps users find the perfect place in Leeds for them to live through answering questions on what is important to them. Individuals can answer as many questions as they like—the more questions they answer, the better the match. Featured questions include whether access to libraries is important, close proximity to dementia friendly cafes and if pubs and restaurants are of interest. Whilst this project was devised as part of the Age Friendly agenda, it’s a website which can be used by anyone to help you find that perfect place! Give it a try and let us know what you think: https://www.thatperfectplace.org/
